SUPAIR - VLD 34 rue Adrastée Parc Altaïs 74650 Annecy - Chavanod FRANCE

45°54.024'N / 06°04.725'E

#### >> Check if you can upgrade your harness yourself

If your harness is deemed to be defective according to the safety warning listing "Chest strap's Safe-T buckle inadvertently opening in flight", (SUP'AIR - 2016/06 - 002), and is part of the following models : - ALTIRANDO 2 RS

- PIXAIR
- PARAMOTEUR EVO
- SKYPPER

You then can repair/upgrade it yourself.

Contact your local dealer for help or SUP'AIR directly to receive a Safe-T kit upgrade.

Contact SUP'AIR via: E-mail : sav@supair.com Phone : +33 (0)4 50 45 75 29 Website : www.supair.com >> CONTACT

### >> Check for compatibility first

Before any modification, check for the "Safe-T kit" upgrade to be fully compatible with your harness buckles.

To complete the verification :

- Open the chest strap's self-locking buckle.
- Put the "T" buckle hardware piece aside.
- Take the new "Safe-T kit".
- Close the self-locking buckles using the new "Safe-T" kit".

If the locking mechanisms works :

- a locking sound is heard
- the locking pins are up and correctly engaged

Then

The validity is confirmed : you can upgrade the "T" buckle hardware.

## >> How to change the male "T" harware piece

#### 1 >> Locate the hardware to change

The "Safe-T" kit must be swapped; the "T" hardware piece needs to be upgraded.

2 >> Cut the old "Safe-T" strap loop

Cut the old "Safe-T" strap loop connected to the leg strap.

Beware not to damage the leg strap.

3 >> Roll the new "Safe-T " kit's elastic sleeve up

4 >> Install the new "Safe-T kit"

5 >> Completing the installation

The new "Safe-T kit" is now installed !

If in doubt, do not hesitate to contact your local dealer/distributor or our customer service department.

Thank you for trusting us and happy flights.
